

Since registering for the "Do Not Call" list, the number of unwanted solicitations has reduced significantly. I have concluded that I have nearly recovered 100% of my telephone. I am strongly in favor of the retention of the additional strength that the State of New Jersey has added to this registration. I do not wish to see this strength diminished in any way. The "loopholes" that may have surfaced in the federal Act should be plugged by adding features that a state may have enacted, not weakened by removal of those state strengthening features.
